## Cyclone Power Technologies in the News... In Detroit

**Cyclone** has been featured in the Detroit Automotive Technology section of the Examiner.com. The online column discusses the potential for the company's all-fuel capable external combustion engine to power automobiles and power generators for plug-in hybrid electric vehicles.

"Imagine having the choice to run your car on gasoline one day and 100% pure biodiesel the next. Better yet, imagine having such fuel options for a generator engine like the one used in the Chevy Volt to charge the batteries for extended-range driving. It would be the best of all green and semi-green worlds," writes the author, Frank Sherosky.
